CROP PROGRESS AND CONDITION MONTH OF JANUARY 2016

AGRICULTURAL SUMMARY: Warmer than normal temperatures and below normal moisture conditions predominated around the State in January. North Central Wyoming reports a mild winter so far which has helped keep livestock in good condition. Eastern Wyoming reported that a normal to slightly colder and moist winter is progressing. Southern Wyoming reported that the weather has been cold with sporadic snow storms. They also reported that it is taking extra forage to maintain livestock in good condition due to the cold. Western Wyoming reported few calves have been born yet, snow pack is near normal and the real cold weather has moderated. Stock water supplies across Wyoming were rated 1 percent very short, 15 percent short, and 84 percent adequate.

Monthly reports will be released for February on Monday, February 29, 2016; and for March on Monday, March 28, 2016.

CROP AND LIVESTOCK PROGRESS
